

A FRIGHTENING BOY

The scene took place in the USA, in a manor, next to wood, where a scary boy, whose name was William, was living. He was a student and he wore a black school uniform.

Actually, William had a serious problem. At nightfall, the boy transformed into a vampire and spent the night in the wood next to his house. In the morning, William transformed again to become a young “normal” boy and forgot everything that happened during the night...

One evening, at nightfall, a teenage girl was jogging in the wood. William, who had already turned into a vampire, was hidden at the top of a tree. Suddenly, when the girl was close enough, he threw himself on her, killed her and left her, lying on the path. Then, William went back to his house, transformed into a human in the morning and forgot everything.

A few days later, the corpse of the victim was found under the leaves by a walker whose name was Marc. Marc called the police and an investigation started. The next day, the police discovered the identity of the teenage girl. Her name was Kate, she had brown hair, she was fifteen years old and she was a student. Her clothes were torn up and she had strange bites on her neck, her arms and on her legs too.

The next week, the police searched the wood and found out the manor. However, when they entered the manor, it was empty and nobody seemed to live there.
Actually, William had left the USA... Did he know he was the murderer?

THE END
